Phone calls in Spinney: staff guide

For liaisons, managers and admins.

You can now ring people straight from Spinney, and Spinney keeps a record of every call for you.

Before you start (once only)

Ask your manager or admin to check that:

1. **You have a Spinney account** with the right role (Liaison, Volunteer liaison, Manager or Admin).
2. **Your phone extension is linked to your Spinney account.** Your extension is your phone number on the office system, for example *1000*.
3. **You have your Linkus login.** Linkus is the phone app you use on your computer.

Then, on your computer:

1. Open **Google Chrome**.
2. Add the **"Yeastar Linkus for Google"** extension from the Chrome Web Store. Ask for help if you haven't done this before.
3. Click the small **Yeastar icon** at the top right of Chrome and choose **Linkus Web Client**.
4. **Log in** with your Linkus details.
5. Plug in your **headset**.

Every day

Keep the Linkus tab open and logged in while you work. Your calls go through it.

Making a call

1. In Spinney, go to **Liaison → Calls → Due today**.
2. Open the call you want to make.
3. **Move your mouse over the phone number.** A small phone icon appears.
4. **Click the icon.** Linkus rings the number.
5. Talk as normal, then hang up.

You can also ring from:

- a service user's page (the number is just under their name),
- the **Service Users** list (the Phone column),
- the **People** and **Companies** lists.

> You can't ring a number while it's inside a box you're editing. Use the number shown under the person's name instead.

After the call

You don't need to record the call yourself. Spinney does it for you within about a minute.

If they answered

1. Go to **Liaison → Calls**. Your call now says **"Answered – add notes"**.
2. Open it and click **Add call notes**. **Answered** is already chosen.
3. Write your **call notes**.
4. Check the **next call date**. It's filled in for you from their call plan.
5. If you're worried about them, switch on **Raise support / safeguarding concern**.
6. Click **Save outcome**.

Please add your notes the same day. The call isn't finished until you do.

If they didn't answer

Nothing to do. Spinney records the attempt and moves the call to the **next working day**.

If they still haven't answered after the last attempt, Spinney tells your manager.

If you hung up quickly

If you rang off within **10 seconds** (for example, you dialled the wrong number), it doesn't count as an attempt.

When someone rings you

- **If Spinney knows the number,** Linkus shows their name and can open their page in Spinney. If they have a call due today, that call opens, ready for your notes.
- **If Spinney doesn't know the number,** see *Calls from unknown numbers* below.

Seeing past calls

Open a service user, person or company and click the **Phone calls** tab. You'll see:

- when each call happened, and who made or took it,
- whether it was answered, and how long it lasted,
- **Play**, to download the recording.

Calls from unknown numbers

Calls with numbers that aren't on anyone's record appear under **Liaison → Unmatched calls**. You'll see the calls you handled. Managers and admins see all of them.

For each call, choose one of these:

If the caller is…	Do this

If the caller is…	Do this
Someone already in Spinney	Click **Link to contact**, find them, and leave **"Save this number…"** on. Their calls will be recognised from now on.
A new person needing help	Click **…** then **Start enquiry**. The number and time are filled in for you.
Spam or a wrong number	Click **…** then **Dismiss**.

Calls nobody deals with are deleted automatically after **90 days**.

Recordings

- Calls are recorded. **Play** downloads the recording to your computer.
- Recordings are personal information. **Don't share them**, and delete the downloaded file when you've finished.

Something not working?

Problem	Try this
No phone icon on the number	Refresh the page (press **F5**, or **Cmd+R** on a Mac). Check that the Linkus tab is open and logged in.
Still no icon	The number may be wrong or incomplete. A UK mobile starts with **07** and has 11 digits. Fix it on their record.
My call isn't in Spinney	Wait a minute and refresh. If it's still missing, tell your manager (your extension may not be linked).
A known person's call is under Unmatched calls	Their number is missing or different on their record. Use **Link to contact**.
The wrong call was updated, or none was	Tell your manager. A call due on a later day isn't updated early.

For managers and admins

Adding a new member of staff

1. In Spinney, go to **Workspace → Users**, open the person, and give them a **Liaison**, **Volunteer liaison**, **Manager** or **Admin** role.
2. In the **Yeastar phone system**, link their **extension** to their Spinney account: **Integrations → CRM → Spinney → User Association**. Choose their name next to their extension, then **Save**. If you don't have access to the phone system settings, ask whoever manages it.
3. Make sure they have a **Linkus login**.
4. Ask them to ring a mobile and answer it. The call should appear in Spinney within a minute.

Until step 2 is done, none of that person's calls are recorded in Spinney.

Keeping things tidy

- Check **Liaison → Unmatched calls** regularly. The number next to the menu shows how many are waiting.
- **Dismiss** spam in bulk: tick the calls, then click **Dismiss selected**.
- Keep an eye on calls marked **"Answered – add notes"** that are more than a day old, and remind liaisons to finish them.
- When someone leaves, remove the link between their extension and their Spinney account on the phone system.

Need more detail?

See the **Spinney phone system guide** (the technical version) in the same folder.
