

Enquiries & Service Users — User Guide

This guide covers working with Enquiries, Service Users, Notes, and External Care Plans. The admin panel is at spinney.j-commerce.co.uk/admin.

1. Enquiries

Enquiries track every incoming and outgoing contact — phone calls, walk-ins, emails, online messages, and referrals. They live under **Liaison** → **Enquiries** in the sidebar.

Viewing the Enquiry List

The list shows all enquiries sorted by date (most recent first). Each row shows:

- **Direction** (Inbound / Outbound) and **Call Type** as badges
- **Category** and **Caller name** (or "Anonymous")
- A preview of the **reason for contact**
- **Safeguarding** icon (red warning triangle if flagged)
- **Staff member** assigned, **Department** badge, **Status** badge
- **Date** the enquiry occurred

Filter the list using the filter button at the top right — you can narrow by category, status, direction, call type, source, department, staff member, safeguarding flags, or a date range.

Creating an Enquiry

Click "**New Enquiry**" at the top right. You'll go through a 4-step wizard:

Step 1 — Caller Identity

- Choose **Known Caller** (someone already in the system), **New Caller** (add them on the spot), or **Anonymous / Withheld**
- For known/new callers, type to search for or create the person
- Phone number is optional

Step 2 — Enquiry Details

- Direction: select **Inbound** (they called us) or **Outbound** (we're calling them)
- Call Type: General, Follow-up, Check-in, Scheduled, or Emergency
- Source: Phone, Walk-in, Email, Online, or Referral
- Category: pick the most relevant option
- Briefly describe the **reason for contact**
- Set the date/time it happened (defaults to now)

Step 3 — Assignment & Safeguarding

- Assign a **Department** (optional) and a **Staff Member** (defaults to you)
- For outbound enquiries, set a **Due Date**
- Toggle **Safeguarding Flags** on if there are any safeguarding concerns, then describe the **Risk Flags**

Step 4 — Actions & Outcomes

- Record any **Advice Given** or **Action Taken**
- Add a **Referral** (internal or external) and specify the destination

Click **Create** and you're done.

Viewing an Enquiry

Click any enquiry in the list to open the detail view. It's organised into sections:

- **Enquiry Overview** — direction, call type, source, caller info, category, status
- **Assignment & Follow-up** — department, due date, any linked follow-ups
- **Safeguarding & Risk** — safeguarding flag and risk notes
- **Narrative** — reason for contact, advice given, action taken
- **Referral** — referral type and destination (if any)
- **Staff & Timeline** — who handled it and when it was logged

From the detail view, you can also **Edit**, **Close**, **Promote to Service User**, **Create a Follow-up**, **Assign to Department**, or **Link to a Person** using the buttons at the top.

Editing an Enquiry

Click the **Edit** button (from the list or the detail view). The form has the same fields as the wizard, shown in sections rather than steps. Make your changes and save.

Closing an Enquiry

When an enquiry is resolved:

1. Open the enquiry
2. Click **Close Enquiry** in the header
3. Optionally set an **Outcome** (for outbound calls — Answered, No Answer, Voicemail, Callback Required)
4. Add any **Closure Notes**
5. Confirm

The status changes to **Closed**.

Promoting an Enquiry to Service User

If a caller needs ongoing support, you can convert their enquiry into a full Service User record:

1. Open an enquiry with status **Open** that has a linked caller

2. Click **Promote to Service User**
3. Fill in their profile details (see the Service User section below)
4. Submit — this creates their login account, updates their profile, and marks the enquiry as **Converted**

All admin users will be notified.

Creating a Follow-up Enquiry

From any enquiry, click **Create Follow-up** to log a new outbound call linked to the original. The caller info and category are carried over automatically.

2. Service Users

Service Users are the people you support. They're listed under **Service Users** → **Service Users** in the sidebar.

Creating a Service User

Click "**New Service User**" at the top right. The form has two main parts:

Identity (top section)

- **Name** (required) and **Email** (required — used for their login)
- Leave **Password** blank to auto-generate one

Service User Details (organised in tabs):

Demographics & Consent

- Date of birth, gender, ethnicity
- Phone, postcode, address (toggle "No current fixed address" if needed)
- Availability (e.g. "Weekdays after 5pm")
- Emergency contact name and number
- **Consent toggles** — Data Storage is required; Referrals and Communications are optional

Assessment

- Addictions (smoking, drugs, gambling, etc.)
- Substances used (heroin, cocaine, marijuana, alcohol, etc.)
- Frequency, amount, and route of use
- Age first used, whether they've overdosed in the last month, injection history
- GP details — toggle "Registered with GP" to fill in name and address

Referral

- Referral type (Self, Agency, Family, Police, Other)
- Previous input (GP, Drug Agency, etc.)
- Other issues (Criminal Justice, Housing, Family, Finance, Health)

- Reason for referral

Service Plan

- Service Team (Assessment, Drug & Alcohol, Spiritual, Education & Outreach, Aftercare)
- Engagement Status (Pending, Active, Inactive, Discharged)
- Next steps (referrals and interventions offered)
- Treatment outcome and internal notes

Click **Create** to save.

Editing a Service User

Open a service user and click **Edit**. The form is the same as Create, pre-populated with their data. Changes to the email address will automatically update their login account too.

3. Service User Notes

Notes let you record free-form case notes, observations, and updates on a service user.

Finding Notes

1. Go to **Service Users** → **Service Users** and click a name
2. Click **Edit**
3. Switch to the **Notes** tab

Adding a Note

1. Click "**New Note**"
2. Enter a **Title** and the **Body** (rich text editor with @mentions — type @ to tag a colleague)
3. Save

The note appears in the timeline below, grouped by date.

Viewing Notes

Notes are displayed as a timeline, newest first. Each entry shows:

- The **title** and who wrote it
- **How long ago** it was written
- The **body** (expand/collapse for long entries)

Notes are internal — visible only to staff members.

4. External Care Plans

External Care Plans track third-party care providers involved with a service user — referrals to Turning Point, ADS, or other agencies.

You can manage them from two places:

- **Service Users** → **Service Users** → Edit a user → **External Care** tab
- **Service Users** → **External Care Plans** in the sidebar

Creating a Care Plan

1. Click "**New External Care Plan**"
2. Fill in:

Provider Information

- **Provider Name** — select Turning Point, ADS, or "Other" (then type the name)
- **Provider Contact** — email, phone, and address

Service User

- **Service User** — search and select (auto-fills their email and phone)

Status & Dates

- **Status** — starts as Pending
- **Referral Date** (required, can't be in the future)
- **Start Date** — appears when status is In Progress or Completed
- **End Date** — appears when status is Completed
- **Support Managers** — assign staff members who oversee this plan

Notes

- **Notes** — visible to the service user if shared
- **Internal Notes** — visible only to staff

Attachments (optional)

- Upload files related to the care plan (clinical documents, correspondence, legal forms, etc.)

Click **Create** to save.

Viewing & Editing a Care Plan

Open a care plan from the list (or the service user's External Care tab). The detail view shows all the information at a glance.

Click **Edit** to update. Note that once a plan is marked **Completed**, changes are locked. You can always add more attachments though.

Attachments

Each attachment can have:

- A **Name** (descriptive label)
- A **Category** (Clinical, Correspondence, Legal, or Other)
- **Tags** for easy searching

To view or download, use the **Open** or **Download** action on the attachment.
